OBJECTIVE:

MSc Data Science student at Coventry university, awarded a Merit, seeking an entry-level or junior-level data analyst role. Skilled in SQL, Python, Pandas and Power BI, with practical project experience in data cleaning, exploratory data analysis, dashboard development and data visualization. Looking to apply analytical skills to real-world datasets and supports data-driven business decisions.

EDUCATION

Master's:

Coventry University, UK — Merit

Msc Data Science,2026

College :

Prathyusha Engineering College, India —7.9CGPA

B.E-computer Science and Engineering,2025

Schooling:

Narayana junior college, AndhraPradesh,Nellore —9.8 GPA

Board of Intermediate Education,2021

TECHNICAL SKILLS

- **Programming & Data Analysis**: Python, Pandas, Numpy, Matplotlib, Exploratory Data Analysis (EDA), Data Cleaning.
- **Databases:** SQL, MySQL, Joins, Filtering, Aggregations, GROUP BY, HAVING, Subqueries.
- **Business Intelligence & Reporting:** Power BI, Power Query, Data Modelling, Dashboard Development, KPI Analysis, Data Visualisation.
- **Statistics**: Descriptive Statistics, Mean, Median, Mode, Variance, Standard Deviation, Percentiles, Quartiles, Outlier Detection.
- **Tools & Version Control:** Git, GitHub

PROJECTS

1. **Hotel Booking Analytics Dashboard | MySQL, SQL, Power BI**

- Analysed hotel booking data using SQL to identify booking trends, cancellations, booking channel performance and hotel-level metrices.
- Wrote SQl queries using joins, aggregations, GROUP BY and HAVING to answer analytical questions.
- Built Power BI dashboards to present key performance indicators and booking patterns.

2. UK IMD 2025 Analysis | SQL, MySQL, Power BI

- Analysed UK Index of Multiple Deprivation (IMD) 2025 data to explore deprivation patterns across geographical areas.
- Used SQL to filter, group and aggregate data for analysis.
- Created Power BI dashboards to visualize deprivation data and communicate key patterns.

3.Rotten Tomatoes Movie Analysis | Python, Pandas, Matplotlib

- Cleaned movie data by handling missing values, removing duplicates and standardising Genre fields.
- Performed exploratory data analysis on movie genres, audience ratings and audience count using pandas.
- Creating Matplotlib visualisations to examine rating distributions, popular genres and relationships between audience counts and ratings.

Honours and Awards

- I have solved over 200+ programs in skill rack portal, such as python and my SQL
- Completed over 20+ Labs in Google Cloud and certified in web dev in udemy platform
